## **DETAILED ACTION**

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2613

2. Claims 16-17, 19-22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 5, 8-11 and 13 of U.S. Patent No. 6,614,953.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of patent '953 contain all the limitations of the rejected claims.

For example, regarding claim 16, patent '953 teaches in claim 1 one input port (line 4), a plurality of output ports (line 5), in claim 3 wavelength selective elements and optical elements, and in claim 8 thin film filters. Inherently, an optical cross-connect has a controller for controlling the optical element.

3. Claims 16-17, 19-20 and 22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 5, 7 and 11 of U.S. Patent No. 6,631,222.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of patent '222 contain all the limitations of the rejected claims.

For example, regarding claim 17, patent '222 teaches in claim 1 one input port (line 2), a plurality of output port (line 4), a plurality of wavelength selective elements, a plurality of optical elements, and in claim 5, MEM mirrors. Inherently, an optical cross-connect has a controller for controlling the optical element.

4. Claims 16-17 and 19-22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 6 and 9-14 of U.S. Patent No. 6,614,080.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of patent '080 contain all the limitations of the rejected claims.

Art Unit: 2613

For example, regarding claim 17, patent '080 teaches in claim 1 an input port (line 4) and a plurality of output ports (line 5), in claim 4, a plurality of wavelength selective elements and a plurality of optical elements, and in claim 6 tiltable mirror.

***Allowable Subject Matter***

5. Claims 1-11, 13-15, 18, 23-35, 40-46 and 48-50 are allowed.

***Response to Arguments***

6. Applicant's arguments with respect to claims 16-17 and 19-22 have been considered but are moot in view of the new ground(s) of rejection.
